

```
<?xml version="1.0" encoding="utf-8"?>
<GridLayout
    xmlns:android="http://schemas.android.com/apk/res/android"
    android:id="@+id/GridLayout"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    android:rowCount="3"
    android:columnCount="2"
    android:layout_marginTop="200dp"
    android:layout_marginBottom="200dp"
    android:background="@color/blue"
    android:useDefaultMargins="true"

    >
    <!-- Child views go here -->

    <Button
        android:id="@+id/button2"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:layout_row="0"
        android:layout_column="0"
        android:text="@string/button"
        android:background="@drawable/border"
    />

    <Button
        android:id="@+id/button3"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:layout_row="0"
        android:layout_column="1"
        android:text="@string/button2"
        android:background="@drawable/border"/>

    <Button
        android:id="@+id/button4"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:layout_row="1"
        android:layout_column="0"
        android:text="@string/button3"
        android:background="@drawable/border"/>

    <Button
        android:id="@+id/button5"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:layout_row="1"
        android:layout_column="1"
        android:text="@string/button4"
        android:background="@drawable/border"/>

    <Button
        android:id="@+id/button6"
        android:layout_width="wrap_content"
```

```

        android:layout_height="wrap_content"
        android:layout_row="2"
        android:layout_column="0"
        android:text="@string/button5"
        android:background="@drawable/border"/>

        <Button
            android:id="@+id/button7"
            android:layout_width="wrap_content"
            android:layout_height="wrap_content"
            android:layout_row="2"
            android:layout_column="1"
            android:text="@string/button6"
            android:background="@drawable/border"/>
    </GridLayout>

```

colour.xml

```

<?xml version="1.0" encoding="utf-8"?>
<resources>
    <color name="green">#4CB350</color>
    <color name="white">#FFFFFF</color>
</resources>

```

border.xml within Drwable Folder

```

?xml version="1.0" encoding="utf-8"?>

<shape xmlns:android="http://schemas.android.com/apk/res/android">
    <!-- Row Background Color -->
    <solid android:color="#FFDDDD" />
    <!-- Border Color and Width -->
    <stroke android:width="2dp" android:color="#FF8484" />
</shape>

```

Qns:

1. What is the structural layout effect of setting `android:rowCount="3"` and `android:columnCount="2"` on the `GridLayout`? How many total cells does this create?

2. Explain the difference between `android:layout_width="match_parent"` used on the `GridLayout` versus `android:layout_width="wrap_content"` used on the child `Button` elements.
3. In your code, `android:background` points to two different types of resources (`@color/blue` on the layout and `@drawable/border` on the buttons). What is the operational difference between a color resource and a drawable resource in Android?
