

Linear Arrangement

LOGICAL REASONING

Five boys – P to T – sit in a row facing North. They sit in five different positions (1 to 5) from left to right, not necessarily in the same order.

(a) P is to the left of S, who is at the end. What are the possible positions of P and S?

(b) P is two places away to the left of S, who is at the end. What are the possible positions of P and S?

(c) P is in between (Q and S) who are at the ends. What are the possible positions of P?

(d) The number of persons to the left of P is the same as the number of persons to the right of Q. What are the possible positions of P and Q?

Five boys – P to T – sit in a row facing North. They sit in five different positions (1 to 5) from left to right, not necessarily in the same order.

(i) Two boys sit in between P and S.

(ii) R sits exactly in the middle of the row but not adjacent to P.

(iii) Q sits to the right of T.

(a) What (is/are) the order/s in which these five boys sit?

(1) T S R P Q

(2) T S R Q P

(3) P T R S Q

(4) P Q R S T

(5) Both (2) and (3)

(c) Who is to the immediate left of S?

(1) Q
determined

(2) R

(3) P

(4) T

(5) Cannot be

(b) How many boys sit in between P and T?

(1) One

(2) Two

(3) Three

(4) (1) or (2)

(5) Cannot be determined

Five persons (P to T) sit in a row facing South, not necessarily in the same order.

(i) Q is to the right of S and is not at any one of the ends.

(ii) R is to the left of P.

(iii) S is to the immediate left of T, who is at the centre.

(a) Who is to the immediate left of Q?

(1) R

(2) S

(3) P

(4) T

(5) Cannot be determined

(b) Which of the following is the order, right to left, in which these persons sit?

(1) P R T S Q

(2) R P T Q S

(3) P Q T R S

(4) P Q T S R

(5) Cannot be determined

Seven persons –E, F, G, H, I, J, and K –sit in a row facing north, but not necessarily in the same order. The following information is known about them. Three persons are sitting between E and J. The number of persons who sit to the left of E is the same as the number of persons who sit to the right of J. Either F or I sits adjacent to J.K sits second to the right of H. G sits at an end and sits second to the right of F.

1. Who sits in the middle of the row?

- (1)K (2)I (3)F (4)J (5)E

2. What is the position of G with respect to J?

- (1)Second to the left
(2)Immediate left
(3)Third to the left
(4)Immediate right
(5)Second to the right

3. Who sits at the left end?

- (1)H (2)G (3)J (4)E (5)K

Six persons –P to U–stand in a queue, but not necessarily in the same order.

(i) Exactly two persons stand ahead of S and exactly two behind R.

(ii) Two persons stand between P and T.

(iii) P stands exactly in between R and U.

(a) Who stands ahead of S but behind Q?

(1) R

(2) P

(3) T

(4) R or P

(5) P or U

(b) How many persons stand behind Q?

(1) One

(2) Two

(3) Three

(4) Four

(5) Five

Eight persons –I, J, K, L, M, N, P, and Q –are standing in a queue, not necessarily in the same order. The following information is known about them. Only two persons are standing between I and L. I stands just behind P. Three persons are standing between L and M. I is not standing adjacent to M. K stands adjacent to J and N. At least one person stands between L and J.

1. Who stands just behind L?

- (1)K (2)N (3)P (4)Q (5)Cannot be determined

2. How many persons stand between Q and P?

- (1)One (2)Zero (3)Two (4)Three (5)None of these

3. Who stand(s) exactly between K and P?

- (1)Q (2)J (3)N (4)L (5)Q and I

Circular Arrangement

LOGICAL REASONING

Six Persons –P to U–are seated around a circular table, but not necessarily in the same order.

(i)P is to the immediate left of S.

(ii)Q sits opposite T but not adjacent to P.

(iii)Ris to the immediate right of U.

(a)Who is two places away to the left of T?

(1)R (2)U (3)Q (4)S (5)P

(b)Who sits opposite P?

(1)Q (2)U (3)R (4)T (5)Cannot be determined

(c)Who is to the immediate right of T?

(1)R (2)S (3)U (4)P (5)None of these

Six persons–P to U–sit around a rectangular table, not necessarily in the same order. Two persons sit along each of the longer side and one sits along each of the shorter side. Further it is known that

(i)Q is to the immediate left of S and is not adjacent to U. Q is at one of the shorter ends.

(ii)R sits opposite T but is not adjacent to S.

(a)Who sits opposite Q?

(1)T (2)P (3)U (4)R (5)S

(b)Who is two places away to the left of U?

(1)Q (2)S (3)T (4)P (5)R

(c)How many persons are sitting in between P and S?

(1)One (2)Two (3)Three (4)Zero (5)Cannot be determined

There are eight people sitting around a circular table. Among them four are facing the centre and other four are facing away from the centre.

(i)G is to the immediate right of H.

(ii)A is facing the centre. A is second to the left of B.

(iii)H is in the opposite position of A and they face different directions.

(iv)G and A face the same direction.

(v)There are two people sitting between B and G.

(vi)E and C are adjacent to each other and E is in the opposite position of F.

(vii)B and C face different directions.

(viii)F is second to the left of D.

1.Four among the following five are alike in a certain way and so form a group. Find the one that does not belong to that group.

(1)A (2)D (3)G (4)C (5)H

2.Who is sitting in the opposite position of C?

(1)F (2) D(3) B(4)G (5)None of these

3.Which of the following is the position of C with respect to A?

(1)Second to the right (2)Second to the left (3)Opposite each other (4)Third to the right (5)Third to the left

Distribution & Comparisons

LOGICAL REASONING

Each one of the five persons –P, Q, R, S and T –playa different game among –Basketball, Kabaddi, Chess, Cricket and Football. Each of them belongs to a different city among Pune, Patna, Bengaluru, Kolkata and Chennai.

(i)Q neither belongs to Bengaluru nor plays Chess.

(ii)S plays Football but he is not from Pune.

(iii)The person from Kolkata plays Kabaddi but he is not Q.

(iv)R is from Patna but he does not play Cricket.

(v)P, who is from Chennai, plays Basketball.

(a)The person from Pune plays _____.

- (1)Cricket (2)Chess (3)Football (4)Either (1) or (2)

(b)R is from _____ city.

- (1)Pune (2)Patna (3)Bengaluru (4)Kolkata (5)Cannot be determined

(c)Who is from Bengaluru?

- (1)Q (2)R (3)S (4)T (5)Cannot be determined

Each of the seven persons –Aravind, Kranthi, Sunil, Rajesh, Kapil, Lala and Thomas –is of a different profession among lawyer, doctor, engineer, professor,scientist, journalist and architect. We also have the following information about them.

- (i)Either Aravind or Sunil is the doctor.**
- (ii)Neither Sunil nor Lala is the engineer.**
- (iii)Kranthi is either the lawyer or the professor.**
- (iv)Rajesh is the scientist.**
- (v)Kapil is either the architect or the lawyer.**
- (vi)Thomas is either the doctor or the architect.**

1.Lala is the

- (1)Doctor (2)Lawyer (3)Journalist (4)Professor (5)Cannot be determined

2.Who is the engineer?

- (1)Aravind (2)Sunil (3)Lala (4)Kranthi (5)Cannot be determined

3.Which of the following is the correct pair of the person and his profession?

- (1)Sunil –Journalist (2)Lala –Journalist (3)Kapil –Professor (4)Aravind –Architect

Six boys Ram, Shiva, Bhargav, Srujan, Lala and Rahul are comparing their marks. No two boys scored the same marks. We have the following information about their marks.

(i)Ram scored 66 marks, which is the second least marks.

(ii)Lala scored more marks than Shiva and two other persons only, but Shiva did not score the least marks. (iii)Bhargav scored less marks than Rahul but more marks than Srujan.

(a)What could be the marks of Lala?

(1)65 (2)60 (3)69 (4)66 (5)64

(b)How many boys scored less than Bhargav and more than Ram?

(1)None (2)One (3)Two (4)Three (5)Four

Seven persons –M, N, O, P, Q, R and S –attend the meeting on seven different days of a week starting from Monday through Sunday. No two persons attend the meeting on the same day. The following information is known about them. At least four persons attend the meeting after P. S attends immediately before P. Three persons attend the meeting between M and S. The number of persons who attend after M is the same as the number of persons who attend before O. Q attends the meeting exactly between S and R.

1. Who attends the meeting on Saturday?

(1)M (2)R (3)N (4)Q (5)O

2. In a certain way, O is related to Thursday, in the same way as N is related to Sunday. Following the same way which of the following persons is related to Tuesday?

(1)S (2)P (3)Q (4)R (5)M

Each of seven persons –H to N lives in a different floor of a seven floor building. Ground floor is considered 1st floor, the floor which is immediately above the ground floor is considered 2nd floor and so on, but not necessarily in the same order. The following information is known about them. The floor on which H lives is above the floors on which J and K live. Either I or L lives on the top floor. N does not live on the odd numbered floor. There are three persons living on between the floors on which J and K live, but at least one person lives below the floor on which K lives. The floor on which M lives is immediately above the floor on which N lives. L does not live on the even number floor.

1. 'I' lives on which floor?

(1) 4th (2) 3rd (3) 2nd (4) 5th (5) 6th

2. Who lives on the 2nd floor?

(1) H (2) I (3) N (4) M (5) L
