

Directions for questions 1 to 20: Select the correct alternative from the given choices.

1. (a) $37.5\% \cdot 960 =$
 (1) 160 (2) 320 (3) 360
 (4) 480 (5) None of these
 (b) 22.22% of 2790 =
 (1) 580 (2) 590 (3) 600
 (4) 610 (5) 620
 (c) $\frac{123 \cdot 100}{16.67} =$
 (1) 638 (2) 658 (3) 738
 (4) 783 (5) 838
2. If 20% of x equal to 25% of 600, then x is
 (1) 720 (2) 750 (3) 500
 (4) 800 (5) None of these
3. The weights of P and Q are 40 kg and 50 kg respectively. By what percent, is the weight of Q more than that of P?
 (1) 10% (2) 20% (3) $16\frac{2}{3}\%$
 (4) 25% (5) None of these
4. Ashok's monthly income increased by 20%. His new monthly income is ₹7200. Find his initial monthly income.
 (1) ₹5760 (2) ₹6250 (3) ₹6000
 (4) ₹6400 (5) None of these
5. The ratio of the salary of worker Q for November to that of April was $2 : 1\frac{1}{3}$. By what percent was the salary of the worker for November greater than that of April?
 (1) 30% (2) 35% (3) 45%
 (4) 50% (5) None of these
6. If Umesh's salary is 20% less than Rakesh's salary, by what percentage is Rakesh's salary more than Umesh's salary?
 (1) 20% (2) 22% (3) 25%
 (4) 27% (5) None of these
7. The price of wheat is increased by 25%. By what percentage should the consumption be reduced so that the expenditure on wheat remains the same?
 (1) 10% (2) 25% (3) 30%
 (4) 15% (5) None of these
8. When the price of an article is increased by 30%, its sales decreased by 20%. What is the effect on the revenue of the article?
 (1) 4% increase (2) 6% increase
 (3) 16% decrease (4) 4% decrease
 (5) None of these
9. The length and breadth of a rectangle is increased by 10% and 20% respectively. What is the percentage increase in the area of the rectangle?
 (1) 10% (2) 30% (3) 32%
 (4) 28% (5) None of these
10. Kiran's salary was first increased by 30%, then it was decreased by 30%. If the latest salary is ₹2275, then what was the original salary of Kiran?
 (1) ₹2275 (2) ₹2425 (3) ₹2600
 (4) ₹2500 (5) None of these
11. Ravi decided to give 12% of his salary to his younger brother as pocket money. But he gave ₹1260 which was 60% of what he had decided earlier. How much is Ravi's salary?
 (1) ₹18,500 (2) ₹16,500 (3) ₹17,500
 (4) ₹15,800 (5) None of these
12. If the numerator of a fraction is increased by 230% and its denominator is increased by 120%, the resulting fraction is $\frac{9}{16}$. Find the original fraction.
 (1) $\frac{3}{8}$ (2) $\frac{8}{11}$ (3) $\frac{4}{7}$
 (4) $\frac{5}{8}$ (5) None of these
13. A student got 40% of the maximum marks and failed by 40 marks. Another student got 60% of the maximum marks and got 20 marks more than the pass marks. Find the maximum marks.
 (1) 200 (2) 400 (3) 500
 (4) 300 (5) None of these
14. The ratio of the number of boys and girls in a class is 5 : 3. If 20% of the boys and 60% of the girls have passed in first class, then what percentage of the class has passed in first class?
 (1) 35% (2) 32% (3) 34%
 (4) 33% (5) None of these
15. A's expenditure is 20% more than B's expenditure. B's expenditure is 30% less than C's expenditure. By what percentage is A's expenditure less than C's expenditure?
 (1) 16% (2) 12% (3) 14%
 (4) 18% (5) None of these
16. A person spends 70% of his income. If his income is increased by 30% and expenditure by 20%, then what is the percentage increase in his savings?
 (1) $54\frac{2}{3}\%$ (2) $54\frac{1}{3}\%$
 (3) $53\frac{1}{3}\%$ (4) $53\frac{2}{3}\%$
 (5) None of these

17. Mr. Alok spends 18% of his monthly income on house rent, 26% on food, 12% on clothes, 8% on education, 6% on travel, 18% on medicine and saves the remaining amount of ₹1,800. What is the total monthly expenditure on education and medicine together?
 (1) ₹3,900 (2) ₹5,200
 (3) ₹6,500 (4) ₹7,800
 (5) None of these
18. Manideep gave 20% of the apples with him to his father. He gave 30% of the remaining to his mother, 50% of what remained to his brother and kept the remaining with him. What percent of the total number of apples he initially had does he now have with him?
 (1) 32% (2) 26% (3) 28%
 (4) 50% (5) None of these
19. The price of an article increased by 20% and then increased by 25%, but the latest price is decreased by 10%. What is the effective percentage change in the price?
 (1) 35% increase
 (2) 30% increase
 (3) 37.5% increase
 (4) 30% increase
 (5) None of these
20. The product of one-sixth of a number and 150% of another number is what percent of the product of the original numbers?
 (1) 12.5% (2) 25%
 (3) 27.5% (4) 35%
 (5) None of these

ADDITIONAL QUESTIONS FOR PRACTICE

Directions for questions 1 to 5: Select the correct alternative from the given choices.

1. Aditya scored 99 marks in subject X. He scored 54% marks in subject Y and m marks in subject Z. Maximum marks of each subject is 200, and overall he scored 58% in three subjects then the value of m is
 (1) 109 (2) 128
 (3) 134 (4) 141
 (5) None of these
2. In an examination A got 20% more than B but 25% less than C. If B got 575 marks out of the maximum marks of 1200, what is the percentage score of C?
 (1) $76\frac{2}{3}\%$ (2) $62\frac{1}{3}\%$
 (3) 75% (4) $72\frac{2}{3}\%$
 (5) None of these
3. In a party, $66\frac{2}{3}\%$ of the people who attended it are men. If 40% of the men and 50% of the total number of persons had left the party, what percent of the women had left the party?
 (1) 25% (2) 70% (3) 75%
 (4) 80% (5) None of these
4. Initial salaries of Aditya and Bhaskar are ₹30,000 and ₹40,000 respectively. After a year the salary of Aditya increased by 30% and the salary of Bhaskar by 25%. By what amount is Bhaskar's salary more than Aditya's salary after the increase?
 (1) ₹10,000 (2) ₹11,000
 (3) ₹12,000 (4) ₹13,000
 (5) None of these
5. There are three numbers. Six-seventh of the first number is equal to forty-three percent of the second number. The second number is equal to two-fifth of the third number and the third number is 1500. Find 21% of the first number.
 (1) 53.14 (2) 61.14 (3) 63.21
 (4) 65.12 (5) 66.14
